The screenshot shows the ProQuest interface for a scholarly article. The article title is "Virtual and Space Tourism as New Trends in Travelling at the Time of the COVID-19 Pandemic" by Roman, Michał, Kosiński, Robert, Kumar Bhatta, Arkadiusz, Niedziółka, Andrzej, and Krasnodebski, Andrzej. The journal is "Sustainability, Basel", Vol. 14, Iss. 2, (2022), 628. DOI:10.3390/su14020628. The page is divided into sections: "Full text" (with a "Full text - PDF" link), "Abstract" (with a "Translate" button), and "Full text" (with a "Turn on search term navigation" button). The abstract text discusses the first European COVID-19 infection in February 2020 and the impact of movement restrictions on tourism. A "Related Items" sidebar on the right lists other articles on related topics like "Design of an Active Vision System for High-Level Isolation Units through Q-Learning" and "A Systematic Review of Cases of Acute Respiratory Distress Syndrome in the Coronavirus Disease 2019 Pandemic".

## 8. Klik Full-Text PDF di sebelah kiri tampilan artikel.

This screenshot shows the article's full-text PDF view in a mobile browser. On the left, a sidebar contains a "Full text" section with a "Full text - PDF" link highlighted by a purple box and a white arrow pointing to the right. The main content area displays the article's title, authors (Michał Roman, Robert Kosiński, Kumar Bhatta, Arkadiusz Niedziółka, and Andrzej Krasnodebski), and the journal logo "sustainability". The abstract text is visible at the bottom of the page, starting with "Abstract: The first European COVID-19 infection was recorded in February 2020, and Poland followed in mid-March. Restrictions were imposed on traveling between states and using public space. These movement restrictions forced a search for new, often innovative, forms of tourism. Google Earth virtual reality (VR), Google Street View, and the Chernobyl VR Project are just some of the selected opportunities to create virtual tours. Different activities using VR mean that people can experience".
